

# Ratsupport Link on your Phone

How to put a web link (bookmark) on your home page of your Smart Phone. By Richard C. Anderson, Ratsupport

# Android Phone

Start your web browser on your phone and navigate to the website or web page where you want the link to take you.

Tap the menu button and then tap Add to homescreen.

It is best to enter a name for this shortcut because your browser will add it to your home screen.

# Apple Device

Open your browser and navigate to the website or web page you want on your home screen. Tap the share button.

Now tap the Add to Home Screen button .

# Happy Ending

Thanks for the information. Found it on How To Geek. Thanks Again.
