

RAT Support News Letter

Date: 11/01/2012

News Letter #20 November 2012

This news letter is intended to help the people that I enjoy doing business with and anyone else that happens upon this news letter.

If you don't want to get this news letter on a monthly basis then feel free to email me at support@ratsupport.com and tell me you don't want to be on the list. I will remove you from the news letter list .

1. This has been a very busy month and I am running behind but will get this information out to you now. It is bad weather and all but if you have the new ATT U-Verse connection and don't like it then you might want to check out FUSION from Pacific Internet. I am using this connection and I have good speed and save mucho \$\$ over my ATT account. <http://www.pacific.net/> .
2. If any of you have been interested in Windows 8 then I suggest you check out this article. <http://news.yahoo.com/windows-8-terrible-says-usability-expert-jakob-nielsen-174300612.html> . I think most might want to wait for Windows 9 because I think it will be here before you know it, same as Vista. I have also put some of my comments about Windows 8 on my web site in the blog area. If anyone wants to see Windows 8 , I have it on my portable and would be happy to let you see what you will be getting into.
3. Here is some information on how the Federal Government wants to change what it takes to check out our email etc. <http://news.yahoo.com/senate-bill-rewrite-lets-feds-read-your-e-mail-without-warrants-191930756.html> .
4. It is good to see that the Android operating system from Google is starting to put a hurt on Apple. As most of you should know I am not a big fan of Apple for many reasons and if you are interested send me an email with your questions as to why I feel the way I do or check out my blog page and put a comment there. <http://www.ratsupport.com/wordpress/> .
5. Please make sure you do your updates, Operating System, Java, Anti-Virus software and Anti-Spyware software. Here is a site that gives information on the condition of the internet and what is the current status of problems. <http://www.securelist.com/en/> . There is a discussion of Mobile Devices on the above site : http://www.securelist.com/en/analysis/204792168/Mobile_Malware_Evolution_An_Overview_Part_4 , and I suggest your reading about what is happening on these devices if you have one.
6. As the Christmas season is here , be sure to be save in using your car, smart phone and computer. If you see things on your device that you did not request, be sure to investigate the problem at that time. I could do something bad.
